

**IN THE SPECIFICATION:**

Please replace the paragraph beginning at page 4, line 15, with the following amended paragraph:

Figures 5 and 6 are diagrammatic fragmentary views in longitudinal section of an instrument with main and auxiliary fibrous reservoirs, the auxiliary reservoir being slideably mounted in a rear portion of the body of the instrument and shown in an inactive position in Figure 5 and in an active position in Figure 6. Figure 7 shows the relation of the components at the rear of the instrument.
